An Excursion to Hyderabad

Recently our school took us to an educational trip to Hyderabad last month. We were going to Hyderabad from Nanded. The staff had already reserved our tickets for the transport/vehicles we'll need in the excursion. We got into the train and reached Secunderabad and we checked-in at Hotel nearby Ramoji Film City. The hotel was descent and later we visited Ramoji Film City by the bus provided by theme park holiday. It serves as a tourist destination and popular tourist attraction. It includes a

variety of natural and artificial attractions including an amusement park. If you were not in the excursion with us, I would definitely recommend you to visit Ramoji as it is filled with creativity, riches and many more things. It takes at least 1 day to travel the Ramoji.

The next day our spot was Birla Planetarium and Birla Temple. The planetarium was worth it visiting, it is like a museum, it has paintings, experiments, statues, and much

more. The Birla temple is a temple at a peak mountain spot, it was of the Lord Balaji and was made up of marble and is beautiful."

The view from the temple was adorable we could almost see 70% Hyderabad. The Parliament house, Amusement park. Tall buildings, Lake. At night we arrived at the station, had dinner at the station and got into the train again and arrived early morning at Nanded.

It was a memorable trip, we drove back home. The return journey was filled with a bit of sadness, as it was the end of great two days of my school life. I am really grateful you respected principal ma'am for organising a wonderful excursion.

Thank you!

An Excursion to Ratnagiri

Excursion to the heaven in Maharashtra Mother Nature is the ultimate inspiration. When you're feeling sluggish, simply walking outside and getting fresh air can do wonders for your mood and outlook. Often, nature's beauty can take your breath (and words) away. In those moments of awe, we like to turn to some of our favourite nature spot experiences that sum up how we're up how we're feeling.

I'm grateful to the editor of this magazine, my lovely class teacher to give me an opportunity to express my visit to the most mesmerizing spots of mother nature.

It all started with the announcement of the school excursion. I cannot express my happiness when I held the notice of our excursion in my hands! Finally, it was time to go out with my friends! Being a responsible boy! Learn new things and of course have lot of fun!

Our school planed the most beautiful trip ever that I have experienced in my life! The spots were very thoughtfully chosen my

respected Principal Madam. Yes, I'm saying this because when I saw where we are going, this thought came in my mind that Yes, Madam knows what we want!

It was a plan to visit Ratnagiri, Ganpatipule, Panhala Fort, Kolhapur. All these spots have a great history and geographical importance. They are beautiful!

So, as I said before, I was on cloud nine! I was concerned about my parents consent for the trip which made me a little tensed I would say. But to my surprise I was very happily permitted to go! Yeppeee!!! And that was it. I started my plans. I knew it was a new experience for me so I had to be very responsible too while enjoying my time.

Finally, the D - day arrived. On 15th we stated our journey from Nanded railway station to Mumbai first. The train time was actually a fun. My friends and my teachers were with me. I was happy!

Reaching Mumbai station, we boarded the train to Ratnagiri and reached there. The journey to Ratnagiri was beautiful. The

massive Sahyadri hills and the huge Arabian sea made me feel tiny. The tunnels and bridges gave us joyful experience. On arrival to Ratnagiri, we visited Ganpatipule and learned about the location. The place gave us a wonderful scenario and made us realize that the nature is one of the beauties that cannot be compared with anything else.

The next day we were excited to go to Panhala Fort. But before that we visited Thiba Palace created by King Thiba of Myanmar. The architecture was very attractive and made us learn about the history of the palace. We then visited Lokmanya Tilak Smarak which was home of Lokmanya Tilak.

It made us aware about the history of this great freedom fighter and social reformer. Now, the wait was over, we proceeded to the pride of Deccan – The Panhala Fort! The trekking experience was adventure! The fort took us in the Maratha era! The 850 meters massive fort made us proud of our history.

By the way how can I forget to mention about the relishing and healthy food that we had everyday during our excursion! Really, the food we had was very tasty and made our taste buds too go on a fun trip! My Vice Principal and my teachers who accompanied us didn't make us feel that we are away from our parents. The care and love given by them during this period is unforgettable.

Thank you dear Manjusha Madam and all my loving and caring teachers for making us feel so loved!

Coming back to our visits we in Kolhapur visited Shri Mahalakshmi Temple and were lucky to be there at the time of Aarti and

thus felt that goddess Mahalaxmi blessed us all for our bright future.

I actually am falling short of words to describe our visit to the Rankala Lake, Shahu Palace. I would only say that the knowledge that we got by the visit added up in our progress. I would like to mention one more place of our visit that I liked a lot, that is, the Kaneri Math. It was a museum displaying different strands of a village life. It was something different than the museums that I had seen before. I really understood how village life is. It indeed was very attractive to me! I really wish I can experience it.

Finally, with heavy hearts, not willing to go back from the beauty we started our journey back to Nanded on 19th October 2024 from Kolhapur. We reached Nanded on the morning of 20th October where our parents were eagerly waiting to see us after a while. We returned changed, matured and responsible.

This excursion taught us many things. It made us gentlemen! We understood

that life gives us different experiences at different times. We should learn from everything that comes forward and wait to see what's next!

Waiting for one more year to go, so that, I get one more wonderful trip from my wonderful school!
